

The Institute of Scrap Recycling Industries (ISRI) and JASON Learning partner to help students and educators understand the importance of recycling. Educators have access to a free, recycling education curriculum, containing lesson plans, hands-on activities, and interactive web-based experiences, for students in **grades K–12**.

Educating Youth about Recycling

Through this curriculum, the message of recycling, has reached millions of students across the country, and inspire America's students to think about careers in the scrap and recycling business, and give them exposure to the scientific and technical background that such jobs require.

To access the curriculum and for more information visit [ISRI.org/Jason](https://www.isri.org/jason).

Recycling Video and Poster Contest

ISRI and JASON Learning co-sponsor an annual video and poster contest for students in grades K-12. Students explore recycling-related themes by integrating STEM education with art and video. Each year the grand prize is a trip to ISRI's annual convention and exposition.

Reach out to your local schools, community centers, scouting associations, and other groups, and spread the contest on social media feeds. Serve as an industry ambassador and good neighbor and support this year's contest.

For complete contest guidelines, helpful resources, and more information visit [Jason.org/contests](https://www.jason.org/contests).
