

For **Y**our **D**riving

Are you Overloaded?

Professional Drivers know the risk of operating with an excessive load:

- Accident potential from unstable cargo
- Ticket potential for operating illegally
- Potential damage to equipment
- Bad public image of driver and scrap recycler
- Legal liability for driver and company

Operating with a full – but legal – load is ideal. We achieve the greatest efficiency and profitability if our loads are near the upper limit, without damaging equipment or risking a fine.
