

Focus on the job at hand to stay accident free!

Distractions in everything we do can have disastrous consequences! Remain focused on the task at hand whether it's driving, parking, backing, handling scrap, or anything else.

Drivers have unique risks that most people in the scrapyards miss. Highway hazards are everywhere you go. More than half of the average day drivers are exposed to the unsafe behaviors of all the other motorists who often think you can stop on a dime, you can change direction at any time, and you know what they are thinking.

Always pay attention, avoid distractions, stay focused! Your livelihood depends on it!
