

For **Y**our **S**afety

A Weekly e-mail Promoting the Health & Safety
of Workers in the Scrap Recycling Industry

Looking for a better way to protect
the feet and legs of your pickers?
Here's an idea: fit them with
baseball catcher's shin guards.
You can pick them up at any
sporting goods store.

In cases of heavy falling
object hazards to the
feet—consider putting
your pickers in boots with
metatarsal guards.
Preventing one broken
foot will pay for many
pairs of boots.

This idea comes to us
from our friends at
Charleston Steel & Metal.

If you have an idea you'd like to share
with the rest of the recycling industry,
send it to joebateman@isri.org
