

Before you start the job—

PLANT YOUR FEET AND GIVE YOUR FAMILY 30 SECONDS OF YOUR TIME.

If you missed the recent ISRI Safety & Environmental Council meeting, you missed one of the best line ups of speakers in our history. Lee Marchessault of Workplace Safety Solutions was outstanding in his presentation of arc flash and electrical safety. His foundational safety premise above applies to every job we do. Let's take it to heart.

Before starting every job, plant your feet and take 30 seconds to consider the hazards:

What could go wrong?

What is different since the last time I did this job?

Do I have all the right tools?

Do I need help?

Going home to our family safe and whole is worth 30 seconds of our time to make sure we're doing it the right way. Just take the time.

Do it safely, or don't do it at all.
